

Snake Inn to Kinder Downfall via Fair Brook.

Details

Distance: 7.7 miles. Total Ascent: 675 m. Approx. Time: 4 – 5 hours.

Profile:

This is strenuous walk, with the option of a scramble up the Fair Brook gully if the water level is low.

I have assumed that we can arrange parking in the Snake Inn car park, if we eat there after the walk, but if not, there are parking places on the road.

According to Walk Highlands Website calculator, the duration, using Naismith's rule is 3½ hours but I expect that we may not walk as fast as that.

The walk up to the top is on a good footpath, looking down into the brook. The crossing to the Downfall crosses the Kinder River, but this is wide and shallow during the Summer. On my last visit there were Peregrin Falcon nesting on the rocks beside the Downfall.
